PREFACE.

Enumeration Abstract.

THE fifth decennial Census of the population of Great Britain was taken on the 7th of June, 1841, under the authority of two Acts of Parliament, viz. 3 and 4 Vict. cap. 99, and 4 Vict. cap. 7.

It may be necessary to give a sketch of the machinery by means of which the present Census of the Population of Great Britain has been taken, inasmuch as it differs very materially from that which was adopted on former occasions.

In the years 1801, 1811, 1821, and 1831, the Overseers of the Poor in the several parishes were the parties directed by the respective Acts of Parliament to furnish the information required for England and Wales,—a body of men, in many parts of the country, fully competent to the task thus imposed upon them, and anxious to discharge it to the best of their ability; but in some districts, from want of education, or habits of business, and from ignorance of the importance and real object of the inquiry they were conducting, essentially unfitted for it. The mode and form in which the information was to be procured and returned by them, differed entirely from the plan adopted in 1841. Questions referring to the numbers, ages, and occupations of the persons to be enumerated within their parishes were delivered to them, to which they were to return answers, the result of their own inquiries, while the work was directed to be performed by them *day after day*, if one day was found insufficient, till answers to all the queries were obtained.

Upon the present occasion, the information required, embraced not only the particulars furnished in 1831, but also the exact age, occupation, and place of birth of each person; the Act moreover directed that the business of numbering the people should be completed "*in one day*," in order to obviate the chance of inaccuracy from omissions or double entries to which the extension of the inquiry over a greater period might have given rise.

The Census Act, 3 and 4 Vict. cap. 99, directed that the Officers of the Registrar-General of Births, Deaths, and Marriages, throughout England and Wales, should be employed under our orders in carrying out the arrangements required under this new system.

By means of the Superintendent-Registrars and Registrars, the whole of England and Wales was, in accordance with directions furnished by us, divided into Enumeration Districts, the boundaries of which were strictly defined, each being regulated as to its extent by the varying circumstances of facility of communication or density of population, but so that it should contain not more than 200, and not less than 25 inhabited houses; while in no case should it include a larger extent of country (where houses were scattered over a thinly populated district) than an active man could travel over between morning and sunset on a summer's day, and obtain from each person dwelling therein all the particulars required by the Act.

To the office of Enumerator, was appointed by the Registrars, (subject to our approval,) one individual for each of these sub-divisions, selected from the neighbourhood, with reference to his particular fitness for the office. In consequence of the small size to which these districts were necessarily limited, no less than 35,000 such persons were required for England and Wales; and a careful inspection of the Schedules returned by them has

enabled us to announce that notwithstanding the large number of persons thus to be selected, their duties were carefully and intelligently discharged.

All public institutions, barracks, gaols, and workhouses, were, in accordance with the provisions of the Act, directed to be enumerated by the several officers residing therein.

Schedules were furnished to the Enumerators, and to the heads of each Public Institution, in which they were to enter—not the answers to a set of questions applicable to their particular division, as in 1831—but the actual

Each Schedule contained a sufficient number of these pages to embrace the Census of the District, each page containing 25 lines.

Directions given as to the Manner in which Entries were to be made in the Enumeration Schedule.

After "*City or Borough of*" write the name, if the District is in a City or Borough; if not, draw a line through those words, or through whichever of the two the District does not belong to. After "*Parish or Township of*" write the name; if there is no Township in the Parish, draw a line through "*Township*;" if it is a Township, write the name of the Township, and draw a line through "*Parish.*' If it is Extra-Parochial, draw a line through "*Parish or Township of,*" and write "*Extra-Parochial*" over those words, and after it the name.

description of each person who had slept within it on the night preceding the 7th of June, 1841, with reference to each head of inquiry.

The whole of these schedules were ordered to be returned to us, after having been examined by the several Registrars, and submitted to, and countersigned by, the Superintendent-Registrars.

In the column headed "*Place*," write the name of the house (if it has a name), or of the street or other part of the town, or of the village, hamlet, or extra-parochial place in which it stands, opposite to the mark denoting each house, or the first house in the street, &c., and write *do.*" opposite to every other in the same street, &c.

"*Houses.*"—Insert houses uninhabited or building in the manner shown in the Example, writing "1 *U.*" or "1 *B.*," as the case may be, in the proper column, opposite to the inhabited house to which each stands nearest. Every house which is unoccupied at the time of your visit, and is believed not to have been slept in the night before, may be inserted as uninhabited. New houses, not yet inhabited, may be inserted as "*Building.*" Where there is a row of such houses, the total number may be inserted before the letter *B.*, instead of the separate insertion of each.

By "*House*" is meant *Dwelling-House;* and every building in which any person habitually sleeps must be considered as a dwelling-house; but buildings, such as churches or warehouses, or any others which were never used, or intended to be used, as dwelling-houses, must not be inserted.

"*Names of each Person who abode therein the preceding night.*"—Insert, without distinction or omission, *every* living person who abode or slept in each house. Leave no blank spaces between the names, but enter each immediately after the one preceding it, so that each page may contain 25. Set down one after the other those who have the same surname, beginning with the heads of the family, and put no others between them. As long as the surname is the same do not repeat it, but write "*do.*" Where there are more christian names than one, as "John William," or "Maria Louisa," write down only the first.

When the person is a Peer or Peeress, the title may be written instead of the name. The words "Lord," "Lady," "Sir," "Rt. Hon.," "Hon.," may be put before the names of those to whom they belong.

If no christian name has been given to an infant, write "*n. k.*" for *not known*, as in Example.

If, as may happen in a lodging-house or inn, a person who slept there the night before has gone away early, and the name is not known, write "*n. k.*" where the name should have been.

At the end of the names of each family draw a line thus /, as in Example. At the end of the names of the inmates in each house draw a double line, thus //.

"*Age and Sex.*"—Write the age of each person opposite to the name in one of the two columns headed "Males and Females," according to the sex.

Write the age of every person under 15 years of age as it is stated to you. For persons aged fifteen years and upwards, write the lowest of the term of 5 years within which the age is. Thus, for Persons aged—

15 years and under 20 write 15	45 years and under 50 write 45
20 years and under 25 write 20	50 years and under 55 write 50
25 years and under 30 write 25	55 years and under 60 write 55
30 years and under 35 write 30	60 years and under 65 write 60
35 years and under 40 write 35	65 years and under 70 write 65
40 years and under 45 write 40	70 years and under 75 write 70

and so on up to the greatest ages.

If no more can be ascertained respecting the age of any person than that the person is a child, or is grown up, write "*under* 20," or "*above* 20," as the case may be.

"*Profession, Trade, Employment, or of Independent Means.*"—Men, or widows, or single women, having no profession or calling, but living on their means, may be inserted as *independent*, which may be written shortly thus, "*Ind.*"

The profession, &c., of wives, or of sons or daughters living with their husbands or parents, and assisting them, but not apprenticed or receiving wages, need not be set down.

All persons serving in Her Majesty's *Land* service as officers or privates in the Line, Cavalry, Engineers, or Artillery, may be entered as "*Army*," without any statement of their rank, adding "*H. P.*" for *Half Pay*, and "*P.*" for *Pensioner.*

All persons belonging to Her Majesty's *Sea* service, including Marines, may be entered as "*Navy*," adding "*H. P.*" for *Half Pay*, and "*P.*" for *Pensioner.*

All domestic servants may be entered as "*M.S.*" for *Male Servant*, or "*F. S.*" for *Female Servant*, without statement of their particular duties, as whether butler, groom, gardener, housekeeper, cook, &c. &c.

Insert all other professions, trades, or employments, as they are described by the parties, or by others on their behalf, writing "*J.*" for *Journeymen*, "*Ap.*" for *Apprentice*, and "*Sh.*" for *Shopman*, after the statement of the trade of those who are such. "*Master*" need not be inserted; every one will be so considered who is not entered as journeyman or apprentice.

Time may be saved by writing the following words shortly: thus, "*M.*" for *Manufacturer*, "*m.*" for *Maker*, as "*Shoem.*" for *Shoemaker*, "*Cl.*" for *Clerk*, "*Ag. lab.*" for *Agricultural labourer*, which may include all farming servants and labourers in husbandry. Use no other marks or abbreviations but those herein allowed.

Rank, or any such term as "*Esq.*" or "*Gentleman*," must *not* be entered in this column.

"*Where Born.—Whether in the same County.*"—Write opposite to each name (except those of Irish, Scotch, or Foreigners,) "*Y.*" or "*N.*" for *Yes* or *No*, as the case may be.

Whether in Scotland, Ireland, or Foreign Parts—Write in this column, "*S.*" for those who were born in *Scotland;* "*I.*" for those born in *Ireland;* and "*F.*" for *Foreigners.* This latter mark is to be used only for those who are subjects of some Foreign State, and not for British subjects who happen to have been born abroad.

Enter the Totals at the bottom of each page as in the Example, and enter and add up all the Totals in the Summary in the last page. This may be done at home, and must be written with *ink.*

_____ *Registrar.*

I CERTIFY and declare that I have examined the Account of the Population contained in this Schedule, which is signed by the Registrar, and was delivered to me on the day of 1841, and that he has duly performed the duties required of him in regard to the same, and that no inaccuracies have been discovered therein which have not been duly corrected, as far as has been possible.

Witness my hand, this day of 1841.

_____ *Superintendent Registrar.*

From the subjoined specimens it will be seen that the number of houses inhabited, uninhabited, or building, were ascertained from the actual entry of each house under its proper description in the very place where it stood.

The name, age, sex, and occupation, as given by each individual, were entered in the Enumerator's Schedule, to be returned to us in that form, in order to be afterwards arranged in such classification as might be considered most useful for public information.

In addition to these Enumeration Schedules, we suggested the issuing, under the authority of a subsequent Act of Parliament, Householders' Schedules, in the annexed form,* which were placed in the hands of each householder a few days before that appointed for taking the Census, thus informing him, before the arrival of the enumerator, as to the nature of the particulars required, all of which he was directed to enter at full length beforehand in the same form in which they were to be afterwards transferred by the enumerator to his own Schedule.

The Householders' Schedules contributed in no small degree to the accuracy of the Returns, particularly from large establishments, while they greatly lightened the labours of the Enumerators on the day on which the Census was taken.

It must be evident that the distribution of the whole of Great Britain into minute subdivisions upon the principle above alluded to, viz.; that no Enumeration district should comprehend a greater area than could be visited by one person in the course of a day, added very materially to our preparatory labours, as in such arrangements we were obliged to have regard to the variable circumstances of the density of population and the nature of the country to be traversed; we were happy, however, to find that every Enumerator was able to complete his work within the day, without the risk of the errors which might have resulted from a second day's counting.

With regard to the Enumeration of Scotland, the agency through which it was conducted was substantially the same as that of former years. The superintendence of the enumeration of each Parish was generally entrusted to the official schoolmaster, than whom no one could be better qualified for the task. In other respects the same preliminary measures were taken in Scotland as in England, each parish being divided into Enumeration Districts when too extensive or populous for an Enumerator to obtain the requisite information in one day.

The Sheriff Substitute of each County was placed (for the purposes of the Census) in the same relation to the several schoolmasters as the Superintendent-Registrars in England were to the several Registrars. And Mr. Cay, the Convener of Sheriffs in Edinburgh, greatly facilitated the preliminary

business of each County, by the assistance he afforded us in making the necessary arrangements.

It will be seen, that in the following Abstract we have retained the fundamental subdivision of Counties into Hundreds throughout the greater part of England, Wapentakes in Yorkshire, and Parts of Lincolnshire and Nottinghamshire, and Rapes and Lathes in some of the southern Counties, which had been adopted in 1801–11–21–31.

We have not deemed it necessary to reprint the elaborate account of the origin of these ancient divisions, which has already a place in each of the four Prefaces to the Abstracts of those years. Indeed, had the present been the first occasion of taking a Census of the Population, we might have been disposed to disregard these divisions, and retain only that of Parishes and Counties; as considerable inconvenience often arises from portions of Parishes being situated in two Hundreds; while an alphabetical arrangement of the Parishes of each County would be more accessible for the ordinary purposes of reference.

Considering, however, that to facilitate a comparison between the respective periods it was advisable to prepare the Abstract as nearly as possible in the same form as that adopted on former occasions, and, in the absence of any legislative direction to take a different course, we have continued the subdivision of Counties, first into Hundreds, Wapentakes, &c. and then into Parishes; furnishing, moreover, an alphabetical index of Parishes and Places, by which each may be found under its respective Hundred.

In the present Abstract considerable pains have been taken to distinguish the population of distinct places forming parts of Parishes, such as Townships, Tythings, Hamlets, or Villages, which had not been separately noticed in any former Abstract; and where a return of the population of such places could not be given, their names have been inserted in the Notes at the foot of each page.

The number of Parishes returned in the present Abstract is	11,769
The number of distinct places forming parts of Parishes is .	13,702
Making the number of places separately noticed .	25,471

The number of Places of which the population is distinctly stated is 22,303, being 5601 more than were returned in 1831.

Throughout the Abstract, the Municipal Boroughs and Towns of England and Wales, and the Royal Boroughs of Scotland, are placed in their respective Counties; the particulars of the Parliamentary Boroughs being given in an Appendix.

In the Abstract for Scotland, besides numerous additional Returns of places similar to those above alluded to, the population of the Parishes *quoad sacra*, has been added. Prior to 1831, with a view to meet the exigencies of the case, Ministers had been appointed to attend to the spiritual condition of the people belonging to certain localities; but no districts had been defined for their labours, nor were they invested with the general privileges of parish ministers; but since that period, by the authority of the General Assembly of the Church of Scotland, their condition has been closely assimilated to that of parish clergymen, and districts have been assigned to them, which have the character of parishes, *quoad sacra*.

Although the existence of such Parishes is precarious, it has been deemed proper to give a separate Return for each, without impairing the integrity of the mother parishes out of which they have severally been formed.

The present Volumes contain all the information obtained under the authority of the above-mentioned Acts, except that relating to the occupations of the population of Great Britain, and the Parish Register Returns.

The tables of the Occupations of the people will form a separate publication; as they could not be incorporated with the Enumeration Abstract. They

will be published, when completed, together with the Parish Register Abstract; which latter, however, has lost much of its interest, from the greater correctness of the information furnished on the subjects to which it refers, by the Annual Reports and Tables issued by the Registrar-General of Births, Deaths, and Marriages.

As the information contained in this Abstract differs in some respects from that printed on former occasions, a few general remarks are added in explanation of the results furnished under each column.

AREA.

The Area as assigned to the several Parishes in England in the Abstract of 1831 has been adopted in the present Abstract. Attempts have been made without success to obtain authentic information whereby the apparent inaccuracies which exist in this computation of the Area might have been remedied; but nothing short of an actual survey would be calculated to give a more accurate result than has been here obtained by the labours of the late Mr. Rickman.

HOUSES.

It will be found that the number of *inhabited* houses has increased in a greater ratio than the population, both in England and Wales, a circumstance which would appear to show an increase of comfort, and of those habits of separate and independent residence which are so characteristic of our countrymen. In England and Wales the proportion per cent. of inhabited houses to population, in 1831, was 17·85, or 2,481,544 houses to a population of 13,897,187, or, in other words, 5·6 persons to each house; in 1841, the proportion of houses to every 100 of the population was 18·50, or only 5·4 persons to every house. Such is the result for England and Wales, showing that while the number of inhabited houses has increased at the rate of 18·6 per cent. in the last ten years, the increase of population has been 14·5 per cent. in the period ending 1841, although it was 16 per cent. in the period ending 1831. Two short tables* are here subjoined, one showing the results

Note.—The two first periods exclude, while the three last include the Returns for the Islands in the British Seas.

of a similar comparison for some of the municipal towns and districts of Great Britain; the other the number of persons to inhabited houses in England and Wales at each decennial period since 1801.

It will be seen that in the Metropolis the proportion of houses to inhabitants is slightly diminished, while in Middlesex it has remained stationary.

In Lancashire the average number to each house is very little above, and in Yorkshire it is slightly below that of all England, and in both counties house accommodation has increased in a greater proportion than the population.

With respect to the Return of Houses for Scotland, a comparison with the Return of 1831 has been rendered impracticable, owing to a misconstruction of directions on the part of many of the enumerators, and the peculiar difficulty attending the proper discrimination of *houses* from *tenements*.

By diligent investigation, and by collating the present Returns with those of 1831, we have been enabled to arrive at the conclusion, that the proportion which the population of Scotland now bears to the inhabited houses is rather above that exhibited in the Abstracts of 1831.

The total number of FAMILIES in Scotland, as returned in the Schedules, amounted to 550,428, or in the proportion of 1 to 4·76 of the population. The number of families in 1831 was 502,301, or in the proportion of 4·71 to the population. The total number now given in the Abstract as of Inhabited *Houses* is augmented by (in numerous cases) the return of families instead of houses.

By comparing this total of families with the number of houses as given in the Abstract (502,852), it will be seen that in most cases throughout Scotland flats, apartments, and families have been reckoned and returned as distinct houses.

* The Population, as given for Edinburgh City and Suburbs, includes (for sake of comparison with the Returns of 1831) the Parishes of North and South Leith; but they are no longer considered as Suburbs of Edinburgh.

† The Population as given for Aberdeen City, includes (for sake of comparison with 1831) the whole of Old Machar Parish.

PERSONS.

The following Table will show the Number of Persons enumerated in each County of England, Wales, and Scotland, with the progressive increase of Population at each decennial period since 1801; also the Number of Parishes and Places of which the population is distinctly stated in the Enumeration Abstract, together with the Area of each County in English statute acres.

To this Table is added another showing a similar comparison of the Population of several principal towns, wherein it has been necessary to give two columns of population for the year 1841, the one exhibiting each place according to its limits as they existed at former periods, the other according to its present boundaries, whether extended or otherwise.

[a] The entire Parish of Coylton contains 1,484 Inhabitants. The increase of population since 1831, is attributed partly to the subdivision of large farms, but principally to building, and to the working of coal-mines.

[b] The decrease of population in the United Parishes of Craigie and Barnweill, since 1831, is attributed to the reduction of men employed at the lime-works.

[c] The Return for the Parish of New Cumnock includes the Villages of Castle, Path-Head, Mansfield, and Afton-Bridgend, containing respectively 155, 325, 122 and 261 Inhabitants.

[d] The Parish of Dalmellington is a Burgh of Barony.

[e] The decrease of population in the Parish of Dalrymple, since 1831, is attributed to the decay of several farm-steadings, and to the completion of the works at Cassillis Castle, where, in 1831, a great number of labourers were employed.

[f] The entire Parish of Dundonald contains 6,716 Inhabitants. The return for Dundonald includes the Villages of Dundonald, Oldrome and Shewalton, containing respectively 345, 257 and 219 Inhabitants.

[g] Fullarton quoad sacra is comprised for the most part of the Town of Irvine, and includes 3,053 of the Inhabitants thereof in Dundonald Parish. The Return includes 32 seamen in Irvine Harbour.

[h] Troon quoad sacra (including the Village of Loans containing 205 Inhabitants, 95 persons in vessels in Troon Harbour, and 23 persons in tents), contains 2,306 Inhabitants. The increase of population, since 1831, is attributed partly to the Parish being a favourite resort for sea-bathing, but principally to the erection of Troon Harbour, and consequent improvement of trade. The Town of Troon contains 1,409 Inhabitants.

[i] The increase of population in the Parish of Galston, since 1831, is attributed principally to the improvement of the cotton manufacture, and to the erection of an iron furnace in the neighbourhood. The Return includes the Villages of Galston and Old Bridge-End.

[k] The Town of Mauchline contains 1,336 Inhabitants. The decrease of population in the Parish since 1831 is attributed to the removal of several families to the manufacturing districts, and to emigration, 114 persons having emigrated since 31st December 1840. The Return includes the Villages of Haugh and Auchmillan, containing respectively 79 and 24 persons.

[l] The Return for the United Parishes of Monkton and Prestwick states that 24 males and 8 females were temporarily absent. The Burgh of Barony of Prestwick contains 1,152 Inhabitants.

[m] The increase of population in the Parish of Muirkirk, since 1831, is attributed principally to the re-opening of iron-works. The Return includes the Village of Glenbuck, containing 237 Inhabitants.

[n] The increase of population since 1831, in the Parish and Burgh of Barony of Newton-upon-Ayr, is attributed to its being the terminus of a railway. Newton-upon-Ayr forms part of the Parliamentary Burgh of Ayr, from which it is separated only by the River Ayr. The Return states that 18 seamen were absent.

[o] The entire Parish of St. Quivox contains 6,055 Inhabitants. The increase of population since 1831, is attributed to the success of the coal-works and manufactures, and to the demand for labourers consequent upon agricultural improvements.

[p] The Return for the Parish of Riccarton includes the Villages of Hurlford and Sornhill, containing respectively 371 and 95 Inhabitants. The increase of population, since 1831, is attributed to the opening of additional coal-mines, the erection of brick and tile-works, and to the establishment of a large calico print-field, and cotton printing-works. Twenty persons have emigrated since 31st December 1840. Part of this Parish is situate within the Parliamentary boundary of the Burgh of Kilmarnock.

[q] The entire Parish of Sorn contains 4,054 Inhabitants. The decrease of population, since 1831, is attributed chiefly to the substitution of machinery for manual labour.

[r] The Return for the Parish of Tarbolton includes 28 persons in barns. The Village of Tarbolton contains 1,083 Inhabitants.

Note.—The principle followed in most of the Returns for the County of Ayr has been to reckon Flats, or divisional parts of houses (when occupied by separate families), as distinct inhabited houses, without reference to the buildings; whereas, in the Returns of 1831, distinct houses only were reckoned. This will account for the apparently great increase of inhabited houses.

Emigration.—In the Returns for the County of Ayr, 48 Males and 28 Females are stated to have emigrated to the Colonies and Foreign Countries since 1831; besides which, some of the Returns mention emigration to have taken place without stating the amount.

by the impossibility of ascertaining the exact numbers of immigrants. It might not be unreasonable to assume that the amount of emigration, although very extensive, does not differ widely from the amount of immigration, which will always result from the temptations held out by capital and enterprise to the productive classes of every kind. In confirmation of this it will be seen, that (although there is no reason to suppose that the fecundity of the population is there less than in England) the population of Ireland has only increased, according to the Returns presented by the Irish Commissioners, at the rate of 5½ per cent. It cannot be doubted that a large proportion of the increase that would there arise from the mere excess of births over deaths, has gone to swell the Returns of the existing population of England and Scotland. Here, again, it should be borne in mind, that the immigrants will be generally just of the age most likely still further to increase the population, their children born in the last ten years serving to swell the number of those "born in the county" in which they were enumerated. When we come to examine the column (included in these Returns) which contains the birth-place of those living in each place, it will be generally found that every remarkable increase in the population is attended by a proportionate increase in the number of persons not natives of the place which is the subject of inquiry.

AGES (above and under 20).

The next columns give the numbers of each sex above and under 20 years of age, for the sake of comparison with a Return of the number of males of 20 and upwards, which appeared in the Abstract for 1831. As the Returns of ages are given for all the Hundreds, for the principal towns, for England, Wales, and Scotland, separately, and for Great Britain generally, in greater detail in the Age Abstract, it will be unnecessary to make more than one remark upon these columns. They do not entirely agree with the results of the inquiry made in 1831, which show that the division of the male population into two equal parts occurred then at 20 years of age; a fact, however, which may have resulted from the positive way in which this proposition was presented to the overseers in 1831, *viz.*,—That "If the number of males "upwards of 20 years old should differ materially from one-half of the total "number of males, some error has probably been committed, and the answer "to this question should be examined, and corrected, if necessary." We subjoin a statement as to the actual results of the inquiries made in the several periods of 1821, 1831, and 1841: it will be seen that in 1821 the number of males *under* 20 *years of age* rather exceeded the number of those above 20. In 1831 the difference was to a small extent in favour of *those above* 20, while within the last 10 years a considerable advance has been made in the amount by which those *above* exceed those under 20 years.

In 1821, the number enumerated was,—

Males—Above 20	2,563,926*	
Under 20	2,598,636	
Showing a difference of	34,710,	or 1·3 per cent.—excess of males *under*, over those *above*, 20, or 1013 to 1000.
Females—Above 20	2,817,538	
Under 20	2,562,081	
Showing a difference of	255,457,	or nearly 10 per cent.—excess of females *above*, over those *under*, 20, or 1100 to 1000.

In 1831 (at which period the inquiry was confined to the mere number of *males* upwards of 20 years of age), the number enumerated was,—

---

whereas the actual increase from that cause, taken merely at 1 per cent. on the total population, at each of those periods, should have been—

In 1841	156,978
1840	154,864
1839	152,786

If the account had been added of the year before, it would have fallen still more short of an increase of 1 per cent., but in that, the first year of the operation of the General Registry Act, it is notorious that the registry of births was much less complete than the registry of deaths, which may now be considered perfect. In the three latter years, however, the proportion of registered births to deaths, although it probably approximates to the truth, cannot be taken as a safe basis of calculation.

* This number includes 11,510 militia.

Males—Above 20	3,394,690	
Under 20	3,376,500	
Showing a difference of	18,190,	or 0·5 per cent.—excess of males *above*, over those *under*, 20, or 1005 to 1000.

In 1841, the number enumerated was,—

Males—Above 20	4,071,876*	
Under 20	3,638,610	
Showing a difference of	433,266,	or 11·9 per cent.—excess of males *above*, over those *under*, 20, or 1119 to 1000.
Females—Above 20	4,463,759*	
Under 20	3,661,302	
Showing a difference of	802,457,	or 21·9 per cent.—excess of females *above*, over those *under*, 20, or 1219 to 1000.

But it must here be stated, that while the Returns of 1821 and 1831 exclude registered seamen on shore, the Return of 1841 includes them; these amount to a considerable number, of whom by far the greatest part may be assumed to be above 20 years of age, which will considerably reduce the above difference.

Supposing the Returns to have been correct in 1831 and in 1821, it is a question for consideration to what is to be ascribed the much greater proportion at present existing above 20, than on either of the former occasions. But these results favour the opinion that the value of life of the adult population has increased; though it is also known that the tendency amongst the poorer population to contract early marriages has greatly diminished; a fact which, with other causes, would tend to prove that the increased value of life was not so great as the figures would apparently indicate.

BIRTH-PLACE.

In confirmation of what has already been advanced, *viz.*, that any rapid increase of the population in any particular place is caused by immigration principally, and not by any great disproportion in the number of the births to the deaths, it will be found that in almost every county or place in which the per centage of increase is much above the average, the per centage of those born in the county will be found to be below the average. The average for all England of those born in the county in which they are enumerated is 80·7 per cent.; the average increase of population, as has been already mentioned, is 14·5 per cent. By reference to the subjoined Abstract which we have caused to be prepared, it will be seen that in Durham, Lancashire, Monmouth, Chester, Middlesex, Surrey, Warwick, Stafford, York (West Riding); that is to say, in all the counties which much exceed the average increase of population for England (with the exception of the two last), the number of those born within the county is below the average of England. Of the West Riding of Yorkshire, indeed, it may be remarked, that while the great increase in the population applies only to that Riding, the answers as to the birth-place would include as born within the county those born in the other Ridings from which the immigration would be most likely to take place, so that this can hardly be said to form an exception to the rule laid down. Of the 15 counties that are most below the average rate of increase in population—namely, less than 10 per cent.—there is only one that is not also much above the average in the number born within the county.

It will be seen, that of natives of Ireland there are nearly 300,000 in England and Wales alone, or a proportion of nearly 2 per cent. of the whole population; while, in Scotland, they amount to 126,000, and are in a proportion of nearly 5 per cent. of the population: in the latter country they rise in four counties to upwards of a tenth of the whole number enumerated. In no counties of England, except the border counties of Northumberland and Cumberland, do the Scotch appear, from these Returns, to form a large proportion of the population, and even in these two counties they do not rise above 4 per cent. on the total numbers enumerated, while of the whole English population they barely form a thousandth part.

* These numbers exclude 35,408 males and 11,472 females, whose ages were not specified.

Age Abstract.

As a mere return of the numbers living in each county at the respective ages can convey but little information without reference to the total population within the county, involving at the same time a tedious calculation, while a comparison between two or more counties would require to be repeated, we have had the subjoined tables prepared; one of which exhibits the proportions at each age to 10,000 for every county in Great Britain; and as a similar calculation was made by Mr. Rickman, in 1821 (the last occasion on which a detailed account of ages was attempted), we have shown the results obtained at each period in juxta-position, adding a second table for several principal towns, as in them the influence of particular employments in affecting the numbers at particular ages is more evidently traced. A third table is given, showing the proportion per cent. which the females bear to the males at each quinquennial period of life in the several counties of Great Britain.

It will be seen that, in Lancashire, where the large manufactories are supposed to include so large a juvenile population, the numbers between 15 and 20 are little above the average of England, and as nearly as possible the same as in Huntingdon; whereas in Manchester the proportion of the numbers between those ages nearly coincides with the average of all England. It will be remarked that the numbers below ten (or, in other words, those who have been born since the last Census) do not bear so large a proportion to the total population as was found to be the case in 1821, a result which may be ascribed by some to a diminished proportion of births to the total population, by others to an increased duration of life. Indeed, as a general result, the adult population (that is, the available strength of the country) is increased since 1821 in a greater proportion than that exhibited by the total population.

We have confined ourselves to thus shortly explaining the machinery by which these Returns have been produced, and calling attention to the principal facts and general results of the information furnished in each column. We have studiously avoided entering upon any speculative discussion as to the causes or consequences, deeming it better to rest contented with laying a foundation of facts, leaving it to others to build theories thereon.

TABLE I.—COMPARATIVE STATEMENT of the AGES of PERSONS in the several COUNTIES of GREAT BRITAIN on the 28th day of May, 1821, and on the 7th day of June, 1841, as deduced from the Returns made under the respective Population Acts; showing what would be the Number of Persons of the several specified Ages, supposing (for the sake of comparison) the Number of MALES whose Ages were returned from each County to have been TEN THOUSAND, and the Number of FEMALES to have been TEN THOUSAND respectively.

Estimated Population of England and Wales, 1570—1750.

As an appendage to the Table (page 8) showing the progressive increase of population in England and Wales, as ascertained from the result of actual enumeration commenced in the year 1801, and repeated at decennial periods down to the year 1841, we have to subjoin a calculation of the probable population of England and Wales at six irregular periods anterior to the first enumeration in 1801, and commencing with the year 1570. This Table was compiled by the late Mr. Rickman, with a view to its forming part of the Preface to the Abstract of the Population for 1841, had that work been intrusted to his charge by the Government, as it had been in the years 1801, 1811, 1821, and 1831. His lamented death, in 1840, prevented his taking any further part in forwarding the present Census; and these calculations having been delivered by his executors to the Home Office, were transmitted to us with other documents relating to the business of the Census. The calculation of the population at the various periods was deduced from Returns of baptisms, burials, and marriages obtained by extracts from the registers of such parishes as possessed documents of an early date—a fact which had been ascertained with a view to the present results, by an inquiry in 1831 into the conditions and earliest date of the registers of every parish. The subjoined letter will best explain the nature of the inquiry.*

---

* Reverend Sir, *London, October*, 1836.

Probably it has not escaped your recollection, if you had charge of a parish in the year 1831, that in issuing the Population Schedules of Inquiry as to the number of baptisms, burials, and marriages, I took occasion also to request a statement of the extent and condition of the parish register books in each parish; and I afterwards concentrated the information so obtained in such manner that no essential part of it is omitted in the printed volume which comprises the Parish Register Abstract required by the Population Act of that year.

I confess I was not without expectation by that inquiry to bring to light the unequalled extent of the series of Parish Registers preserved in England, by showing the large proportion of these parochial records which, under the custody of the clergy of the Church of England, has escaped the many casualties which do not fail to occur in every place in the course of 250 years. You will perceive by this limitation of time that herein I do not recur to the original institution of Parish Registers (now three centuries ago), there being no chance of general regularity during the religious convulsions which terminated in the complete settlement of the Reformation in the reign of Queen Elizabeth. Advantage was taken of this in the beginning of the reign of her successor, James I., who promulgated the Canons which are still in force, one of them containing regulations for the improvement and preservation of Parish Registers; and herein the clergyman of each parish was instructed to make a copy on parchment of all extant Register Books, especially as far back as the commencement of the reign of Queen Elizabeth; and to this wholesome regulation we owe most of our ancient Parish Registers, the usual commencement of which is in the year 1558; and the habit of attention to Parish Register Entry in future naturally followed in continuation of these copied registers.

The result is (as ascertained by the inquiry of 1831), that not much less than half the parishes in England possess registers as far back as the year 1600, and of these three-fourths commence as early as the year 1570, to which date, for reasons now to be given, I think any general inquiry ought to be limited.

Such inquiry, with a view of showing the population at certain assigned periods, without imposing an unreasonable burden on the clergy, will be effectual by obtaining the number of baptisms, burials, and marriages at intervals of thirty or forty years, as indeed is rendered almost unavoidable by the political events of the seventeenth century. For the Civil Wars and subsequent confusion of public affairs from 1640 to 1660 caused a general defect in parish registers by the temporary expulsion of most of the clergy from their benefices, so that the years 1630 and 1670 become the most unexceptionable in that century; and the year 1570, checked by the rude enumeration of fighting men at the time of the Spanish Armada in 1588, and compared with the parish registers of the year 1600, will sufficiently indicate the increasing or decreasing state of the population in the reign of Queen Elizabeth.

I do not presume to specify all the purposes for which knowledge of this kind is useful, much less to foresee the various combinations of science to which it may be auxiliary in the progress of intellectual improvement; I rather confine myself to the immediate object of this inquiry, which seeks to ascertain the rate of mortality among the laborious classes of society. With regard to selected lives (by which are meant the lives of those who have been able to purchase Government Annuities of various kinds), the rate of mortality is well known, even the comparative mortality of the two sexes, and the degree in which the duration of such lives has increased in the course of the last and present century; and it has been found by extensive investigation during the last ten or twelve years that the degree or annual average amount of disease may be inferred from the rate of mortality.

The results are arrived at by assuming, in the years 1570, 1600, 1630, 1670, 1700, and 1750, the same proportion of baptisms, burials, and marriages to the existing population as in the years 1800 and 1801; in the last of which years the population was first actually enumerated. The average number of entries in three years (1569, 1570, 1571) forming the basis of calculation for the year 1570, and a similar average for the years 1600, 1630, 1670, 1700, and 1750.

Thus, in the county of Bedford there are extant 394 baptismal entries of the year 1570; and the parishes to which these baptisms belong are found to have 772 baptismal entries in the year 1800.

Or, if 772 baptisms in the year 1800 coincided with a population of 63,393 in 1801, what population is indicated by 394 baptisms in the same parishes in the year 1570?

Baptisms, 1800.		Pop., 1801.		Baptisms, 1570.		Pop., 1570.
If 772	:	63,393	: :	394	=	32,353.
Burials, 1800.		Pop., 1801.		Burials, 1570.		Pop., 1570.
If 468	:	63,393	: :	224	=	30,342.
Marriages, 1800.		Pop., 1801.		Marriages, 1570.		Pop., 1570.
If 123	:	63,393	: :	74	=	38,139.

It will be seen that the materials which form the basis of this calculation have more connexion with the subject of the Parish Register Abstract than with the present volumes. We may, at a future period, enter into the consideration of the merits of the calculation, deeming it sufficient for the present to state that there is reason for supposing the estimate hereby arrived at to be an approximation to the truth.

From these premises it follows, that the rate of stated payments to Friendly Societies for ensuring stated benefits will become fixed on solid grounds, and may be published by authority; and the discouragement which has resulted from the too frequent insolvency of such societies will thus be made to disappear by the application of science to well ascertained facts. In urging the importance of institutions whereby the industrious classes may provide for themselves in the day of sickness, I shall not insist on the effect of the recent alteration of the Poor Relief Laws, whereby the encouragement of Friendly Societies has become an incumbent duty, on public grounds as well as in furtherance of individual benevolence; this indeed is so obvious that I shall not presume to dilate further on the subject.

I have now explained my motives for undertaking the voluntary labour of collecting and hereafter arranging such of the Returns solicited by this circular letter as the clergy may be so good as to afford on this occasion. My experience of their willingness to give assistance in a useful inquiry teaches me to expect 4000 Returns of the year 1600, and not less than 3000 Returns of the year 1570.

I do not ask for distinction of the sexes of those baptized or buried, that not being essential to the purpose of the inquiry, and because the difficulty of reading Christian names in any old manuscript is usually such that a clergyman could not in that case use the aid of his family, or any other voluntary assistance, in answering the questions propounded in the enclosed sheet, at the back of which is a printed address, which will not fail to convey it by the post to me in London.

I shall only add, that as a Circular Letter does not always reach its destination, I shall not conclude that the defect of answer or notice in the course of the next month or six weeks arises from an unwillingness to comply with my request, and in that case shall then transmit a duplicate to every clergyman of a parish possessing an ancient register, lest I should fail in conveying to him my request that he will co-operate with me in obtaining a result which cannot but furnish decisive evidence to all Europe of the steady respectability of the clergy of the Church of England ever since its first establishment, and the readiness of the existing clergy to afford their personal attention in aid of any useful investigation.

I have the honour to be,
Reverend Sir,
Your most obedient servant,
JOHN RICKMAN.

To
The Reverend
The Officiating Minister
of the Parish of

P.S.—I had not intended to ask for a return of three consecutive years at the dates of A.D. 1570, 1600, 1630, and 1670; but on communicating my scheme to Mr. Finlaison, Actuary of the National Life Annuity Office, he urged the superior value of an average of three years so forcibly that I consented for this purpose to risk the defect of a few returns from clergymen who may be discouraged or displeased at this addition to the labour requested of them: in fact the annual fluctuation of the price of corn (that is, of subsistence) affects the number of births, deaths, and marriages so perceptibly that the comparative numbers in any single year would form but an insecure basis of calculation.

No Parish Register of the years 1569, 1570, and 1571 being extant in the Counties of Monmouth and Northumberland, the calculated Population of England at that period must be deficient, and the small proportion extant in some other Counties (to wit, in Cumberland, 15 per cent.; in Lancaster, 14 per cent.; in Westmorland, 8 per cent.; in North York, 13 per cent.; and in Wales, 2 per cent.); affords no satisfactory evidence of their Population, so that the above Totals of England and Wales ascribed to the year 1570 require considerate Revision.

The defect of Parish Registers in Monmouthshire and Northumberland, and the deficiency of Parish Registers in Wales is here submitted to correction in the next page.

No Parish Registers whatever of the year 1570 being extant in Monmouthshire or Northumberland, these Counties afford no entry in the column of Population in the year 1570; which defects therefore must be supplied by the Rule of Proportion applied to all the other English Counties, thus:—

ENGLAND AND WALES, 1570—1750.

Burials, and Marriages, on an average of three Years in 1570, 1600, 1630, 1670, 1700, and 1750, bore the same proportion

Estimated Population of England in 1600, as above . 4,460,454
From which deduct the population of the two counties (Monmouthshire and Northumberland) defective in 1570 98,982
Population of England minus the two counties . . . 4,361,472

	1600.	Population 1600 of the two Counties.	1570.	Population 1570 of the two Counties.
Therefore if	4,361,472 :	98,982 ::	3,737,841 :	84,829

Thus 3,737,841 + 84,829 = 3,822,670, the corrected estimate of the population of England in the Year 1570.

Further; The proportion of Parish Registers in Wales extant in 1570 being no more than ·02, or $\frac{1}{50}$, is not to be relied on, and must be altered according to the nglish Counties; thus,—

Population 1600.	Population 1570.	Wales 1600.	Wales 1570.
If 4,460,454 :	3,822,670 ::	351,264 :	301,038

or 121,441 less in number than the Population resulting from the few Registers actually extant in Wales, giving 4,123,708 for the actual population of England and Wales in 1570.

CONCLUSION.

By the 8th clause of 3 and 4 Vic., c. 99, it was enacted "That the Commissioners shall cause Abstracts to be made of the said Returns in such form and manner as shall be decided upon by the said Commissioners, with the approval of one of Her Majesty's Principal Secretaries of State; and such Abstracts shall be printed and laid before both Houses of Parliament within twelve calendar months next after the first day of September, in the year 1841; or if Parliament be not then sitting, within the first fourteen days of the Session then next ensuing."

On the 11th December, 1840, the Commission was appointed, leaving one year and eight months for completing the work. It was foreseen that this clause of the Act could not be complied with, the information required being unprecedented, and none of the persons enjoined by law to give their assistance having ever been engaged in a similar operation.

The country was to be divided into minute districts, and thirty-five thousand persons engaged to enumerate the people on a stated day.

On the arrival of the enumerators' schedules in London, each individual, of whichever sex, was presented to us with five distinct propositions attached to each name, making upwards of one hundred millions of separate facts to be reduced into tabular statements by copying, and the results to be formed into geographical districts by means of more than three hundred and thirty thousand separate calculations, all of which were to be tested by a system of checks, in order to prevent error. This work was to be accomplished by the aid of an establishment which was to be collected together for the express purpose, remunerated with the lowest salaries, and without prospect of employment from Government beyond the continuance of the office.

For many months the clerks worked twelve hours a-day; and, but for the ready willingness displayed by them on all occasions to devote their time to our necessities, a much longer period must have elapsed before the work could have been printed.

Under these circumstances no apology is considered necessary; but it is right to explain that the Act of Parliament contemplated a result which could not be effected with the means placed at our command, and that great efforts have been made to present the work previous to the close of the present Session of Parliament.

[a] The entire City and Parliamentary Burgh of Aberdeen contains 63,288 Inhabitants, and including the Northern District of Old Machar without the Parliamentary Boundary 64,778 Inhabitants. The apparent increase of population within the Parliamentary Boundary since 1831 is 5,269; but the Return mentions the following circumstances, to show that the actual increase is much greater, viz.: That about 2,000 seamen were absent at the period of taking the Census; and that 500 persons belonging to resident families were enumerated elsewhere. The number of persons employed in the manufacturing establishments in the City has considerably diminished. The northern whale fishery, which used to furnish employment for a number of hands in Aberdeen, has, since 1831, gradually decayed, and is now altogether abandoned; and the number of persons employed in the salmon fisheries has considerably decreased. Since 1831 numerous artisans and spinners have emigrated to the Continent; and, in the Spring of 1841, nearly a hundred carpenters left the port of Aberdeen, to form a ship-building establishment in one of the North American Colonies.

The number of houses returned as uninhabited is small; but it must be observed that, from the manner in which the houses are computed (each building, though possessing several occupants, being reckoned as one house only) there may be several uninhabited dwellings not noticed in the Returns.

[b] The entire Parish of St. Clement contains 7,092 Inhabitants.

[c] St. Clement quoad sacra includes 72 persons in vessels in the harbour of Aberdeen.

[d] North quoad sacra is partly in St. Clement, but mostly in North Parish, and contains 5,671 Inhabitants.

[e] The entire Parish of East contains 4,798 Inhabitants.

[f] East quoad sacra, which is partly in East, partly in Greyfriars, partly in North, and partly in West Parishes, contains 4,037 Inhabitants. The Return for this part of the Parish includes 122 persons in the House of Refuge.

[g] Union quoad sacra includes 191 Military in Aberdeen Barracks.

[h] The entire Parish of Greyfriars contains 5,356 Inhabitants.

[i] John Knox quoad sacra, which is partly in Greyfriars, but mostly in West Parish, contains 3,377 Inhabitants.

[k] The entire Parish of Old Machar (which is partly without the City and Burgh of Aberdeen) contains 28,020 Inhabitants.

[l] Gilcomston quoad sacra includes 77 persons in the West Branch of the Prison.

[m] Holburn quoad sacra includes 25 persons in the Female Orphan Asylum.

[n] The Return for Old Machar quoad sacra includes 11 persons in Mitchell's Hospital, 14 in the Poor-house, and 175 in the Lunatic Asylum.

[o] Woodside quoad sacra includes 14 persons in Middlefield Lunatic Asylum.

[p] The entire Parish of North contains 5,381 Inhabitants.

[q] The Return for this part of East quoad sacra includes 90 persons in the East Branch of the Prison.

[r] The entire Parish of South contains 3,934 Inhabitants.

[s] South quoad sacra, which is formed out of the Parishes of South and West, contains 3,409 Inhabitants. The Return for this part of the Parish includes 146 persons in the Royal Infirmary and 24 in the Deaf and Dumb Institution.

[t] The entire Parish of West contains 10,186 Inhabitants.

[u] The Return for this part of East quoad sacra includes 55 persons in the Boys' Hospital.

[x] Melville quoad sacra includes 24 persons in Shaw's Hospital.

[y] The Return for this part of South quoad sacra includes 168 persons in Robert Gordon's Hospital.

[z] The Parish of Banchory-Devenick is situate partly within and partly without the City of Aberdeen, but mostly in Kincardineshire; the entire Parish contains 2,736 Inhabitants. The increase of population since 1831 is attributed to improvements in agriculture, &c.

[a] The Return for the Parish of Belhelvie states, that 12 persons were absent engaged in the salmon fishery.

[b] The Parish of Drumoak is situate partly in Kincardineshire; the entire Parish contains 811 Inhabitants.

[c] The decrease in the Parish of Dyce (148 persons) since 1831 is ascribed to the incorporation of small farms, and to the proprietors having ceased to work the granite quarries.

[d] The entire Parish of New Machar contains 1,262 Inhabitants.

[e] The increase in the Parish of Newhills (313 persons) since 1831 is attributed to the establishment of an extensive wool factory on the Don-side, and of a large paper manufactory at Honywood; as well as to the more extensive working of the Dancing-Cairn granite quarries.

[f] The Return for the Parish of Peterculter states, that 6 persons have emigrated since 31st December 1840.

[g] The increase of population in the Parish of Skene since 1831 is attributed to the employment of a greater number of labourers at Galogie Mill. The Return states that the agricultural part of the population has not much increased since 1831, in consequence of the conversion of crofts into large farms.

[h] The Return for the Parish of Alford states, that 67 persons have emigrated since 1831.

[i] The increase of population in the Parish of Auchindoir and Kearn since 1831 is ascribed to the enlargement of Leith-Lumsden Village, which in 1831 was but recently formed, and now contains 233 Inhabitants. The Return states, that 40 persons have emigrated within the last 7 years.

[k] The Parish of Cabrach is situate mostly in Banffshire; the entire Parish contains 827 Inhabitants. The decrease (151 persons) since 1831 is ascribed to the suppression of illicit distillation formerly carried on extensively. The return states that 7 persons have emigrated since 1831.

[a] The entire Parish of Coylton contains 1,484 Inhabitants. The increase of population since 1831, is attributed partly to the subdivision of large farms, but principally to building, and to the working of coal-mines.

[d] The Parish of Dalmellington is a Burgh of Barony.

[e] The decrease of population in the Parish of Dalrymple, since 1831, is attributed to the decay of several farm-steadings, and to the completion of the works at Cassillis Castle, where, in 1831, a great number of labourers were employed.

[f] The entire Parish of Dundonald contains 6,716 Inhabitants. The return for Dundonald includes the Villages of Dundonald, Oldrome and Shewalton, containing respectively 345, 257 and 219 Inhabitants.

[h] Troon quoad sacra (including the Village of Loans containing 205 Inhabitants, 95 persons in vessels in Troon Harbour, and 23 persons in tents), contains 2,306 Inhabitants. The increase of population, since 1831, is attributed partly to the Parish being a favourite resort for sea-bathing, but principally to the erection of Troon Harbour, and consequent improvement of trade. The Town of Troon contains 1,409 Inhabitants.

[i] The increase of population in the Parish of Galston, since 1831, is attributed principally to the improvement of the cotton manufacture, and to the erection of an iron furnace in the neighbourhood. The Return includes the Villages of Galston and Old Bridge-End.

[k] The Town of Mauchline contains 1,336 Inhabitants. The decrease of population in the Parish since 1831 is attributed to the removal of several families to the manufacturing districts, and to emigration, 114 persons having emigrated since 31st December 1840. The Return includes the Villages of Haugh and Auchmillan, containing respectively 79 and 24 persons.

[l] The Return for the United Parishes of Monkton and Prestwick states that 24 males and 8 females were temporarily absent. The Burgh of Barony of Prestwick contains 1,152 Inhabitants.

[n] The increase of population since 1831, in the Parish and Burgh of Barony of Newton-upon-Ayr, is attributed to its being the terminus of a railway. Newton-upon-Ayr forms part of the Parliamentary Burgh of Ayr, from which it is separated only by the River Ayr. The Return states that 18 seamen were absent.

[o] The entire Parish of St. Quivox contains 6,055 Inhabitants. The increase of population since 1831, is attributed to the success of the coal-works and manufactures, and to the demand for labourers consequent upon agricultural improvements.

[p] The Return for the Parish of Riccarton includes the Villages of Hurlford and Sornhill, containing respectively 371 and 95 Inhabitants. The increase of population, since 1831, is attributed to the opening of additional coal-mines, the erection of brick and tile-works, and to the establishment of a large calico print-field, and cotton printing-works. Twenty persons have emigrated since 31st December 1840. Part of this Parish is situate within the Parliamentary boundary of the Burgh of Kilmarnock.

[q] The entire Parish of Sorn contains 4,054 Inhabitants. The decrease of population, since 1831, is attributed chiefly to the substitution of machinery for manual labour.

Note.—The principle followed in most of the Returns for the County of Ayr has been to reckon Flats, or divisional parts of houses (when occupied by separate families), as distinct inhabited houses, without reference to the buildings; whereas, in the Returns of 1831, distinct houses only were reckoned. This will account for the apparently great increase of inhabited houses.

[a] Laverock or Leveret-Law was returned in 1831 as a separate Parish; but is now stated to belong to the Parish of Ayton, in the Return of which it is included, though claimed by the authorities of Coldingham Parish.

[b] The decrease of population in the parish of Channelkirk (61) since 1831 is attributed to a number of persons being at that period temporarily employed in making a new road, and to emigration.

[c] The decrease of population in the parish of Chirnside since 1831 is attributed to the preponderance of aged parishioners. Nine persons have lately emigrated.

[d] The entire Parish of Coldingham contains 2,746 Inhabitants; the Return for Houndswood includes the Villages of Auchincraw and Reston, containing respectively 203 and 219 Inhabitants. About 34 persons were temporarily absent from the Village of Auchincraw.

[e] The Town of Coldstream (which is a Burgh of Barony,) contains 1,913 Inhabitants, and the Village of New Coldstream 150 Inhabitants.

[f] The entire Parish of Dunse contains 3,162 Inhabitants. The decrease of population (307) since 1831 is attributed principally to the cessation of manufactures, and partly to emigration, 50 persons having emigrated since 1835.

[g] The entire Parish of Earlstoun contains 1,758 Inhabitants. The Village of Earlstoun contains 927 Inhabitants. The increase of population (46) since 1831 is attributed to the erection of a new street in Earlstoun Village, the flourishing state of the Mid-mill woollen factory, and to agricultural improvements. The Return states that 30 persons were absent.

[h] The increase of population in the Parish of Eccles (61) since 1831 is attributed to an additional number of persons being employed at the tile-works in the neighbourhood. The Villages of Leitholm and Birgham, in this Parish, contain respectively 365 and 241 Inhabitants.

[i] The decrease of population in the Parish of Edrom since 1831 is attributed to the demolition of a paper manufactory at Chirnside Bridge, and consequent removal of 56 persons. The Return includes the Village of Allanton containing 267 persons.

[k] The increase of population in the Parish of Eyemouth (220) since 1831 is attributed to the prosperous condition of the fishery.

[l] The decrease of population in the Parish of Foulden since 1831 is attributed to a number of houses being untenantable.

[m] The decrease of population in the parish of Greenlaw since 1831 is attributed partly to the completion of certain public works which were commenced about that time, and to the removal of several families in search of employment. The Return includes 13 persons in the jail.

[a] The entire Parish of Canisbay (including 13 persons in boats in Freswick Bay), contains 2,306 Inhabitants. The Return for the Parish includes the detached places or Townships of Duncansbay, Freswick, Gills, Huna, East Mey and West Mey, containing respectively 302, 414, 164, 111, 262, and 149 Inhabitants. The decrease of population since 1831 is attributed to the incorporation of small farms, and to the suppression of smuggling. The Parish of Canisbay contains a small part of Keiss, quoad sacra, comprising 221 Inhabitants. This part includes the detached place or Township of Auckingill, containing 209 Inhabitants. The entire quoad sacra, which is mostly in Wick Parish, contains 1,215 Inhabitants.

[b] The decrease of population in the Parish of Dunnet, since 1831, is attributed to the incorporation of small farms, and to the adoption of sheep pasturage in lieu of tillage.

[c] The entire Parish of Halkirk contains 2,963 Inhabitants. The Return states that about 170 males and 130 females have left the Parish by emigration, or otherwise, since 1831.

[d] The entire Parish of Latheron contains 7,637 Inhabitants. The Return for the Parish includes the Village of Dunbeath, containing 40 Inhabitants; and that for Lybster, quoad sacra, the Villages of Lybster and Swiney, containing respectively 279, and 71 Inhabitants. It is stated that about 500 persons were temporarily absent, and that about 70 persons have emigrated since 1831.

[e] The entire Parish of Olrick, or Olrig, contains 1,584 Inhabitants. The increase of population (438) since 1831 is attributed to the establishment of a stone-pavement manufactory at Castlehill, and to increased draining and fencing. The Return states that 11 males and 6 females have emigrated since 1831.

[f] The entire Parish of Reay (situate partly in the County of Sutherland,) contains 2,811 Inhabitants. The decrease of population since 1831 is attributed to the extension of sheep farming, and to emigration—amounting to 90 persons since 31st December 1840. The Return includes 14 persons in boats.

[g] The entire Parish of Thurso (including 100 males and 30 females in vessels in Thurso Bay), contains 4,881 Inhabitants. Thurso is a Burgh of Barony.

Sixteen persons are stated to have emigrated since 1831. For the Parliamentary Burgh of Wick, *see* Wick District, in Appendix.

* In some of the Returns for the County of Caithness, stables and out-houses are reckoned as separate buildings; the reverse of which was the case in 1831. This will account for the apparently large increase of Inhabited Houses.

[b] The entire Parish of Cardross (including 8 persons in tents) contains 4,416 Inhabitants. The increase of population (820) since 1831 is attributed to the extension of calico works.

The Return includes the Village of Cumbernauld, containing 2,227 Inhabitants, of which 936 are within the parish, and 1,291 within Easter quoad sacra. [f] The entire Parish of Old or West Kilpatrick (including 109 males and 3 females in small vessels) contains 7,020 Inhabitants. [h] The entire parish of Luss contains 1,052 Inhabitants.

[i] The increase of population in the Parish of Roseneath (116) since 1831 is attributed to the influx of strangers for the benefit of sea-bathing, and to the employment of mechanics at Barreman House.

[k] The entire Parish of Row (including 65 persons in vessels, barns and tents) contains 3,717 Inhabitants. The Town of Helensburgh (a small part of which extends into the Parish of Cardross) contains 2,229 Inhabitants. [a] The entire Parish of Annan contains 5,471 Inhabitants. The Return includes the chief part of Brydekirk quoad sacra, which extends into the Parishes of Cummertrees and Hoddam; the entire quoad sacra contains 881 Inhabitants. Thirteen males, and 7 females are stated to have emigrated since 31st December 1840. For the Parliamentary Burgh of Annan, *see* Dumfries District in Appendix.

[b] Applegarth Parish includes the ancient Parish of Sibbaldbie, and the Chapelry of Dinwoodie. The decrease of population (142) since 1831, is attributed to the incorporation of farms, and to the conversion of tillage land into pasturage.

[c] The Return for the Parish of Canonbie, states that 6 males and 3 females have emigrated since 31st December 1840.

[d] The entire Parish of Carlaverock contains 1,297 Inhabitants.

[e] The Village of Kelton is mostly in the Parish of Carlaverock, but partly in that of Dumfries. The entire Village contains 154 Inhabitants.

[f] The entire Parish of Closeburn contains 1,530 Inhabitants. The decrease of population (150) since 1831 is attributed to the departure of labourers in search of employment.

[g] The entire Parish of Cummertrees contains 1,277 Inhabitants. The return for the Parish includes part of Brydekirk quoad sacra.—(*See* note [a].) The decrease of population (130) since 1831, is attributed to the incorporation of farms and to emigration, about 11 males and 14 females having emigrated since 31st December 1840.

[h] The entire Parish of Dalton contains 638 Inhabitants. The decrease of population since 1831 is attributed to the incorporation of farms.

[i] The entire Parish of Dornock contains 847 Inhabitants. The increase of population (95) since 1831 is attributed to the rapid growth of Lowthertown Village, chiefly occupied by cotton hand-loom weavers.

[k] The entire Parish of Dryfesdale contains 2,093 Inhabitants. The decrease of population (190) since 1831 is attributed to emigration, to migration of persons in search of employment, and to the demolition of cot-houses in the Parish.

[l] Dumfries consists of two civil Parishes, St. Michael and New Church; of parts of which, St. Mary's, quoad sacra, has been formed. The entire population of Dumfries is 11,409; and that of the Burgh, 10,069 persons. The decrease of population in Dumfries since 1831 is attributed partly to the cholera of 1832, and partly to the depression of trade, about 350 hand-loom weavers, and 200 mechanics having left in search of employment. It is also stated, that in consequence of the increased prosperity of surrounding towns and villages, wherein good shops, stated markets, and branch Banks have been established, Dumfries is no longer, to the extent it formerly was, the centre of general resort for the south of Scotland. The Return states that 40 persons have emigrated since 1831. For the Parliamentary Burgh of Dumfries, *see* Appendix.

[m] The entire Parish of St. Michael (exclusive of the portion allotted to St. Mary, quoad sacra), contains 4,195 Inhabitants. Part of the Parish forms the Landward portion of Dumfries. The Return includes 52 persons in the Royal Infirmary; 50 in the Town Hospital; and 125 in Crichton's Lunatic Institution.

[n] The Parish of New Church (exclusive of the portion allotted to St. Mary, quoad sacra), contains 2,855 Inhabitants. The Return includes 38 persons in the Prison.

[p] The entire Parish of Dunscore contains 1,517 Inhabitants.

[q] The entire Parish of Durisdeer contains 1,445 Inhabitants. The decrease of population since 1831 is attributed to the incorporation of small farms, and to emigration,—about 10 males, and 7 females having emigrated to America since 31st December 1840.

[r] The entire Village of Carronbridge, which is partly in Morton Parish, contains 254 Inhabitants.

[s] The decrease of population in the Parish of Eskdalemuir is attributed to the emigration of about 21 males and 18 females since 1831.

[t] The entire Parish of Glencairn contains 2,094 Inhabitants. The Return states that 3 males and 4 females have emigrated since 1831. Minnyhive is a Burgh of Barony.

[u] The entire Parish of Graitney contains 1,761 Inhabitants. The decrease of population (148) since 1831 is attributed to the demolition of cot-houses, and to extensive emigration.

[x] The entire Parish of Hoddam contains 1,627 Inhabitants. The Return includes a part of Brydekirk quoad sacra containing 80 Inhabitants.—(*See* note [a].)

[y] The entire Parish of Holywood contains 1,061 Inhabitants.

[z] The decrease of population (51) in the Parish of Hutton and Corrie since 1831 is attributed to the incorporation of farms, to the conversion of tillage land into pasturage, and to emigration,—28 persons having emigrated since 31st December 1840, and about 50 since 1831.

[x] The increase of population (56) in the Parish of Glencross, since 1831, is attributed to the erection of an extensive paper-manufactory at Auchendinny.

[y] The Return for the Parish of Heriot includes the Hamlets of Fala Hill Inn, Robertson, and Broomieknowe.

[z] The entire Parish of Inveresk (including 36 persons in private Lunatic Asylums), contains 8,263 Inhabitants. The decrease of population (698), since 1831, is attributed to the prevalence of the cholera in 1832, and to the reduction of persons employed in manufactories.

[a] The Village of New Craighall is partly in the Parish of Inveresk, and partly in that of Libberton; the entire Village contains 336 Inhabitants.

[b] Musselburgh is a Municipal Town, or Burgh, the limits of which are co-extensive with the Parliamentary Burgh thereof; for which *see* Leith District in Appendix. The Return includes the quoad sacra Parish of North Esk, containing 3,414 Inhabitants; also 210 persons in private Lunatic Asylums, and 5 in the Gaol; and states that 49 persons were absent, and that 48 others, in vessels, were not included.

[c] The Parish of Kirkliston is mostly in the County of Linlithgow. The entire Parish contains 2,989 Inhabitants. The Return includes 140 labourers employed on the Edinburgh and Glasgow Railway.

[d] The Parish of Kirknewton is united with East Calder Parish. The united Parishes contain 1,441 Inhabitants. The entire Parish of Kirknewton Proper contains 537 Inhabitants.

[e] The entire Parish of Lasswade, or Laswade, contains 5,025 Inhabitants. The increase of population, since 1831, is attributed chiefly to the erection of paper-mills upon the River Esk.

[f] The Return for Roslin quoad sacra includes the Villages of Rosewell and Roslin, containing, respectively, 133 and 430 Inhabitants.

[g] The entire parish of North Leith (including 200 registered seamen on board vessels in the Docks, and 100 military in Leith Fort), contains 8,492 Inhabitants. In 1831, the Parishes of North and South Leith were returned as suburbs of Edinburgh City; but, by a statute passed in 1838, the Town of Leith (which embraces nearly the whole of both these Parishes), was declared to be completely dissevered from Edinburgh in all municipal and civil relations. For the population of the Town of Leith, *see* note (s) at the end of the County.

[h] The entire Parish of South Leith (including 39 persons in Hawkfield House private Lunatic Asylum), contains 19,776 Inhabitants. The Return states that a part of this Parish has been detached since 1831, and now forms part of Greenside Parish in the City of Edinburgh, and that about 260 seamen, and 120 other persons, were absent (*see* note g).

[i] The Return for the Village of Jocks-Lodge includes 119 military in Piershill Barracks.

[k] The quoad sacra Parish of Lady Glenorchy extends into the Parishes of St. Andrew and St. Cuthbert; the latter in the Suburbs, and the former in the City, of Edinburgh. The entire quoad sacra contains 2,157 Inhabitants.

[l] The quoad sacra parish of Portobello is mostly in the Parish of Duddingston; the entire quoad sacra contains 3,588 Inhabitants. *See* note (t) supra.

[m] The entire Parish of Libberton, or Liberton, contains 3,450 Inhabitants. The Return for the Parish includes the Village of Morton. The decrease of population (613) since 1831, is attributed to the abandonment of coal-mines, and to the demolition of a flour-mill and houses.

[n] The Return for Gilmerton quoad sacra includes Gilmerton Village, containing 548 Inhabitants.

[o] The entire Parish of Newbattle contains 2,033 Inhabitants. The increase of population (151) since 1831, is attributed to the successful working of coal-mines. The Return states that 8 persons have emigrated since 1831.

[p] The entire parish of Newton contains 1,743 Inhabitants. The decrease of population (531) since 1831, is attributed to an erroneous Return at that period, and to the coal-mines being nearly exhausted.

[q] The entire Parish of Pennycuick, or Penicuik, contains 2,572 Inhabitants. The increase of population (317) since 1831, is attributed to the opening of a colliery at Brunstane.

[r] The entire Parish of Ratho contains 1,815 Inhabitants. The increase of population, (502) since 1831, is attributed to the employment of persons on the Railway which runs through the Parish. The Return states that 10 persons emigrated to Australia during 1841.

[s] The Parish of Stow is partly in the County of Selkirk. The entire Parish contains 1,734 Inhabitants. The Return includes 6 persons in tents.

LEITH Town[s]													

* The entire City of Edinburgh contains 56,330 Inhabitants; and, including its suburbs (Canongate and St. Cuthbert's Parishes), 138,182 Inhabitants. It is stated that, since 1831, two new Parishes have been added in the New Town, *viz.*, Greenside and St. Luke's; and that, within the same period, an entirely new division of the Parishes of the Old Town has taken place; one new Parish (that of St. John's), having been added; while various alterations have been made on the boundaries of every one of the other Old Town Parishes. It will therefore be impossible to contrast the population of these Parishes now with what it was in 1831. It is to be observed, moreover (in regard to comparative population), that a small part of the Parish of South Leith, disjoined therefrom since 1831, is now comprehended in the City of Edinburgh. For Parliamentary Burgh of Edinburgh, *see* Appendix.

[t] The entire parish of Temple contains 1,159 Inhabitants. The decrease of population, (96) since 1831, is attributed to the suspension of work at Arniston colliery.

[u] The Village of Stobbsmills is partly in the Parish of Borthwick; the entire village contains 203 Inhabitants.

[x] The entire parish of St. Andrew (including 33 males in the Police Office), contains 4,974 Inhabitants. The new Parish of Greenside has been formed entirely from this Parish.

[y] Lady Glenorchy quoad sacra is partly in the Parishes of St. Andrew, St. Cuthbert, and South Leith. The entire quoad sacra contains 2,157 Inhabitants.

[z] The entire parish of St. George contains 8,075 Inhabitants. The Return states that, since 1831, part of the Parish of St. Cuthbert (Suburbs of City) has been annexed to this Parish.

[a] Greenside is a new Parish, formed, since 1831, out of St. Andrew's Parish; and comprising a district which, in 1831, belonged to South Leith Parish. It is an independent Parish for all civil and ecclesiastical purposes. The Return includes 531 persons in the Prison.

[b] The Return for the Parish of New Grey-Friars includes 207 persons in George Heriot's Hospital, 407 in the Charity Workhouse, and 112 in Bedlam.

[c] The Return for the Parish of Old Grey-Friars includes 50 persons in Trades-Maiden Hospital, and 13 in Minto House Hospital and Dispensary.

[d] St. John's is a new Parish, formed, since 1831, out of New Grey-Friars, Old Grey-friars, and New North Church Parishes; and is now an independent Parish for all civil and ecclesiastical purposes.

[e] The Return for the Parish of Lady Yester includes 399 persons in the Royal Infirmary, and 24 in the Lock Hospital.

[f] The boundaries of St. Mary's Parish remain as in 1831.

[g] The Return for the Parish of New North Church includes 27 persons in the Night Asylum for the Houseless Poor, 149 (including the watchmen on duty) in the Police Office, and 11 in the Lock-up House.

[h] The Return for the Parish of St. Stephen includes 94 persons in the Deaf and Dumb Institution.

[i] The Return for the Parish of Trinity College Church includes 254 persons in Children's Hospital, and 47 in Trinity Hospital.

[k] The Parishes of North and South Leith were returned in 1831 as suburbs of the City of Edinburgh. They are now wholly dissevered from the City.—*See* Note (s) under North Leith Parish.

[l] The entire Parish of Canongate (including 95 persons in the Charity Workhouse, 265 in the House of Refuge, 45 in the Magdalen Asylum, 20 in the Police Station House, and 754 military and 268 other persons in Edinburgh Castle), contains 9,944 Inhabitants.

[m] The entire Parish of St. Cuthbert contains 71,908 Inhabitants. The Return for the Parish includes 272 persons in Hospitals and Asylums, 464 in the Charity Workhouse, 64 in Police Stations, and 30 males and 3 females in canal-boats and tents. A small part of St. Cuthbert's Parish is within the limits of the Town of Leith; but the whole Parish is here returned.

[n] The Return for St. Bernard's quoad sacra includes 17 persons in the Police Station, Hamilton Place.

[o] The Return for Buccleuch quoad sacra includes 30 persons in the Edinburgh General Lying-in Hospital, and 8 in Grange Loan Lunatic Asylum.

[p] Dean quoad sacra extends into the Parishes of Corstorphine and Cramond. The entire quoad sacra (including 133 persons in John Watson's Institution, and 101 persons in the Orphan Hospital), contains 2,262 Inhabitants. The Return includes the Villages of Dean, and Water of Leith, containing, respectively, 159 and 1,024 Inhabitants.

[q] The Return for Morningside quoad sacra includes 52 persons in James Gillespie's Hospital, 68 in the Royal Edinburgh Lunatic Asylum, and 26 in St. Margaret's Convent.

[r] The Return for St. Paul's quoad sacra includes 29 males in the Police Station House, St. Leonard's Street.

[s] The Municipal Town or Burgh of Leith contains 26,433 Inhabitants, and comprises the whole of North Leith Parish (except two houses at Golden Acre), nearly the whole of South Leith Parish, and a small part of St. Cuthbert's Parish. *See* also Note (s) under North Leith Parish. For the Parliamentary Burgh of Leith, *see* Leith District in Appendix.

[a] The entire Parish of Murroes contains 736 Inhabitants.

[b] The entire Parish of Newtyle contains 1,264 Inhabitants. The increase of population (360) since 1831, is attributed to the building of Newtyle Village.

[c] The decrease of population (113) in the Parish of Oathlaw since 1831, is attributed to the cessation of work at Finhaven spinning-mill, and to the demolition of cottages.

[d] The entire Parish of Panbride contains 1,380 Inhabitants. The increase of population (112) since 1831, is attributed to the building of the Village of Newtown of Panbride, and to the erection of a bleaching work.

[e] The entire Parish of Rescobie contains 788 Inhabitants. The decrease of population (20) since 1831, is attributed to the demolition of several houses.

[f] The Hamlet of Marestone extends into the Parish of Aberlemno. The entire Hamlet contains 26 Inhabitants.

[g] The entire Parish of Ruthven contains 471 Inhabitants. The increase of population (108) since 1831 is attributed partly to the temporary employment of labourers, but principally to the erection of a flax spinning-mill, at which women are chiefly employed.

[h] The entire Parish of Strathmartine (which is united quoad sacra to that of Mains) contains 815 Inhabitants. The decrease of population (40) since 1831 is attributed to the stoppage of spinning-mills, and to the introduction of machinery.

[i] The entire Parish of Tannadice contains 1,654 Inhabitants.

[k] The entire Parish of Tealing contains 854 Inhabitants.

[l] The entire Parish of St. Vigeans contains 8,793 Inhabitants. The Return for the Parish includes part of Lady Loan quoad sacra, the remaining part of which is in Arbroath Burgh; the entire quoad sacra contains 2,116 Inhabitants.

* In most of the Returns for the County of Forfar, "flats" and "outbuildings" have been reckoned as distinct houses; this will account for the apparently great increase of inhabited houses since 1831. The large number of uninhabited houses is attributed partly to the depression of trade, but chiefly to the adoption of the "Bothie System."
